

BOOK REVIEW

Koticha, K. K. *Recent Advances in Leprosy (with 582 References from 1990 to 1996) or Supplement (being Volume II) to Leprosy—A Concise Text (being Volume I)*. Thane, West India: Dr. K. K. Koticha, 1996. Softbound, 272 pages, 7 figures, 13 charts. Price Rs.275/- in India, Nepal and Bangladesh only; elsewhere US\$15.00 or UK£10.00 or equivalent (includes packaging, forwarding and postage by registered post). Available from Dr. K. K. Koticha, 901 Nand Park, Lokmanya Nagar II, Thane 400 606, West India.

Dr. Koticha has a remarkable ability to absorb information about leprosy and present it in a concise understandable fashion. His interest in the disease spans molecular biology of *Mycobacterium leprae* to reconstructive surgery. This book is intended to supplement and update his 1990 text *Leprosy—A Concise Text*. His new volume contains 582 references from 1990 through 1996. Dr. Koticha is again to be congratulated for producing a concise, current and comprehensive summation of a vast amount of published information on leprosy.—RCH
